Generating Power | the WhisperPower approach

Smaller, lighter, quieter and cleaner

WhisperPower is an innovative company committed to providing the best solutions for grid-independent marine, mobile and offgrid power systems. We manufacture compact and supersilent generators that comply with the most strongest emission norms (Stage V for Europe, EPA Tier 4 for North America).

Our Genverter inverter based adjustable speed generators are internationally recognized as the most fuel efficient, compact and silent solution to provide on board power. With an extreme accurate output power quality at providing either single phase (230 VAC 50/60 Hz, 100-120 VAC 50/60 Hz) or three phase output voltage. Our 1500/1800 rpm style generators are the best in it's class, offering super silent non-stop power to all on board single or three phase appliance.

Stage V certified

Diesel power generators, as used nowadays, are not very efficient because they are often partially loaded, are over dimensioned and are not equipped with engines that meet current emission standards such as Stage V. Regulations regarding diesel generators for mobile use are becoming more stringer. Not only the emission standard (Stage V is a must) but also the noise level is a central theme.

One-stop-shop

WhisperPower is your one-stop shop for the entire system including all necessary electrical components. The WhisperPower adviser, reseller or installer provides, from the outset, system advice demonstrated on a schematic in which all components are included. Once ordered and delivered, systems equipped with an inverter, charger system, battery and a diesel generator are inspected and commissioned ensuring you are assured of a well-functioning system with no weak links.

Hybrid variants

We have developed a solution against wasting energy which is cost saving at the same time: our OctoPower range of low-to-zero emission power systems are smart, integrated power systems for yachts and commercial craft that include battery/ inverter power provision. Explore our website and discover our extended range of OctoPower products and systems. www.whisperpower.com.

Diagnostics (WhisperCare)

The integration of these various technical systems in to the WhisperPower monitoring and control system enables streamlined and efficient monitoring with one panel. WhisperCare enables remote login to the WhisperPower system with smart phone, tablet or PC over WiFi/ router package with SIM card, available as an option for a WhisperPower system.

Service & support on location

The representatives in our network will provide you with service and technical support in case of repairs or malfunctions. Where possible they will help you on site, wherever you may be in the world. Your nearest dealer can be found on our dealer locator which is available on our website.

whisperpower.com/where-to-buy

The technology of your choice: Adjustable Speed

ADJUSTABLE
SPEED

Our Genverter® range of compact generators combines the latest diesel engine technology with a new way of producing electrical power. Instead of adding an alternator with fixed speed on the back of the fly-wheel, we have designed a very compact permanent magnet alternator (PM), located just behind the engine. As a result, these systems are much smaller and lighter compared to traditional generators. The generator RPM can be fixed to a position offering the optimal balance between RPM, output power, audible noise and vibration.

Go
to page
8

The technology of your choice: Fixed Speed

FIXED
SPEED
1500/1800

Our quiet running, low speed diesel generators are engineered and produced in our factory in Friesland, the Netherlands. These 1500/1800 RPM Super Quiet (SQ) Pro sets are designed for non-stop operation under harsh circumstances in commercial and recreational environments. We utilize top class engines compliant to the latest emission standards which includes Stage V for Europe and Tier 4 for North America.

Genverter® Range 2 | 3 cylinder Indoor versions

ADJUSTABLE
SPEED

Following the world wide success of the Scalino 4, 1 cylinder Genverter® variable speed generator, we have extended our Genverter range to power ratings up to 15 kVA. Perfect in size and weight, super silent and virtually vibration free.

Compact, silent and light weight

- Modern, low emission diesel engine
- Emission level: Stage V, EPA – Tier 4 as standard
- Compact, super noise-damping polyester sound guard
- Available power ratings 8, 10, 12 15, (18 kVA coming up)
- 230 V 50 Hz or 120 V 60 Hz, adjustable by user

Extremely energy efficient

- Efficiency of 96% instead of 75% (traditional systems)
- Lower fuel costs
- Rotating speed can be set to load demand
- External PMG inverter providing the perfect sine wave
- Maximum stability of the Hz at load/ no load and rpm variations

Choose from AC or DC variations

- AC single phase with PMG inverter
- DC versions with 1,2 or 3 DC PowerCubes, fast chargers (24 or 48 VDC)
- Charge power perfect for lithium batteries
- DC system includes land to system charging
- Charge power from 4.3 kW - 13 kW

Essential Remote Communication

WhisperConnect for linking with other devices and USB interface for eventual uploads. Analogue remote controls and cables supplied as standard, digital Touch panels are optional.

Supplied as standard with a DDC panel and a DDC connection box

5 or 7 inch Touch control panel with extended information and remote access (optional)

Total System Solution: Hybrid power system with Lithium batteries (24 VDC) and 14 kVA inverter (230 VAC 50 Hz). Back -up/ fast charging by Elite 10/ and DC PowerCube super chargers of 8.6 kW power.

Compact design - Elite 8, 6.4 kW

Low emission, water cooled engine

Only the best 2 & 3 cylinder engines are applied: long lasting, reliable, silent engines, complying with EPA / Tier 4 (USA standard) and Stage V (European standard). The engine and PM alternator back-end are connected into one cooling circuit and kept on a constant temperature via the radiator fan.

Optimal sound and vibration control

A robust polyester sound guard, optimal tuning of rpm vs power rating and effective engine mounting inside the enclosure result in a audible noise level of less than 55 dBA and virtually no vibration.

Perfect power

WhisperPower's PMG inverter incorporates two main functions: this robust, electronic device converts the generated power (input) into a pure sine wave with fixed Hz (output). The rotating speed is programmable from 2000 to 2800 rpm, select the rotating speed for the needed power. The PMG power inverter is also the power management device, offering full read-out via WhisperConnect to the Touch panel. Voltage and frequencies can be selected.

Works with any electrical appliance

The combination of a perfect sine wave with the lowest distortion and a precise and constant frequency enables any AC electrical device to operate smoothly. A/C's, cooking hobs, compressors, heavy duty tools, computer installations, sound installations, this will all work perfectly.

One-stop-shop

We provide complete installation kits ensuring a qualified, long lasting installation. These include radiator cooling and exhaust kits, battery starting kits and fuel supply systems.

Installation Dimensions

Genverter® Range 1 | 2 | 3 cylinder Outdoor version

ADJUSTABLE
SPEED
AC
OUTPUT

WhisperPower offers a unique range of high-quality diesel generators for outdoor use. They can be exposed to harsh circumstances and are ideal for example as a power system for vehicles that only have space under the floor, or in any other outside location. The units are constructed from high-quality stainless steel sound shields with easily accessible connections for the exhaust system, the radiator cooling system, the fuel supply and the electrical cables. The Scalino 4 is the smallest of the range, followed by the Elite Outdoor 8 and 15 kVA models.

Small, powerful and silent: Scalino Outdoor

The WhisperPower Genverter® Scalino Outdoor is the smallest, quietest and most powerful of its kind. Thanks to the electronic PMG inverter output, it delivers the ideal power quality for any electrical device including small air-conditioning systems, work tools, computers etc. The Scalino can also be used to charge lead-acid or lithium batteries by connecting AC/DC battery charging devices or inverter/ charger combinations. (Use of WhisperPower chargers and combi's recommended).

Unique Inverter Technology

The Scalino and Elite Outdoor generators are a combination of a diesel engine with a flywheel integrated alternator and an inverter, hence the name Genverter. Key feature of this technology is the quality of the output combined with the surge power capability. Within a certain window of the rotating speed of the diesel engine, the PMG delivers the correct power quality to operate electrical equipment, such as tools, compressors, airconditioning, electrical cooking devices and various other AC appliances.

Ready to install

The Outdoor diesel generators come complete with all the fittings needed to connect the generator to the fuel tank, the engine to the cooling system, cables to connect the starter engine to the starter battery and electrical wiring to connect the Scalino Outdoor to external electrical power system. The PMG inverter has to be installed separately from the generator in a dry location.

Scalino 3.4 kVA Genverter

Outdoor 8 kVA Genverter

Radiator & Top-Cool

PMG Inverter

Supplied as standard with DDC panel and DDC connection box

5 or 7 Touch control panel with extended information and remote access

Stage V Certification for all models

The Genverter generators meet the Stage V exhaust emission requirement, legally obligatory for generators used in Europe in vehicles and movable objects. For the Scalino, Stage V certification is optional. The Elite Outdoor models are also compliant to EPA Tier 4 emission standard.

Optimal sound and vibration control

A robust polyester sound guard, optimal tuning of rpm vs power rating and effective engine mounting inside the enclosure result in a audible noise level of less than 55 dBA and virtually no vibration.

Works with any electrical appliance

The combination of a perfect sine wave with the lowest distortion and a precise and constant frequency enables any AC electrical device to operate smoothly. A/C's, cooking hobs, compressors, heavy duty tools, computer installations, sound installations, this will all work perfectly.

Air/water-cooled concept

The Scalino engine, designed by WhisperPower, has a unique cooling principle. The engine is cooled by its own lubrication oil which is circulating through a closed system in which a cooling radiator is integrated. The oil (hence the engine) is kept at a constant temperature by a fan blowing outside air through the radiator. Our 2/3 cylinder models are liquid cooled, cooling is done by a roof or side installed radiator system.

Perfect power

WhisperPower's PMG inverter incorporates two main functions: this robust, electronic device converts the generated power (input) into a pure sine wave with fixed Hz (output). The rotating speed is programmable from 2000 to 2800 rpm (3400 max for the Scalino model), select the rotating speed for the needed power. The PMG power inverter is also the power management device, offering full read-out via WhisperConnect to the Touch panel. Voltage and frequencies can be selected.

Essential Remote Communication

WhisperConnect connection for interconnection with other devices and USB interface eventual uploads. Analogue remote controls and cables supplied as standard, digital Touch panels are optional.

One-stop-shop

We provide complete installation kits ensuring a qualified, long lasting installation. These include radiator cooling and exhaust kits, battery starting kits and fuel supply systems.

Twin Diesel Genverter®

Double the power, reduce fuel and maintenance costs

A complete range of compact, adjustable speed single phase AC diesel generators based on inverter technology, our new Twin-Power range. The upgraded Genverter range can now be delivered with parallel connectivity which is adding just a fraction to the price but offering huge advantages.

Cost saving and redundant

This Twin-Power concept is offering at least 25% of fuel saving compared with traditional generators, as the units will follow the required AC power consumption pattern (low mode, high mode). Traditional power generator systems are in general oversized in order to be able to deliver the peak of power consumption which on average general has a short duration. By installing two Genverter generators in parallel, one unit can be switched off during low power consumption periods. Very important advantage of the power solution is the redundancy of power sources offered by this solution.

Scalino Twin configuration

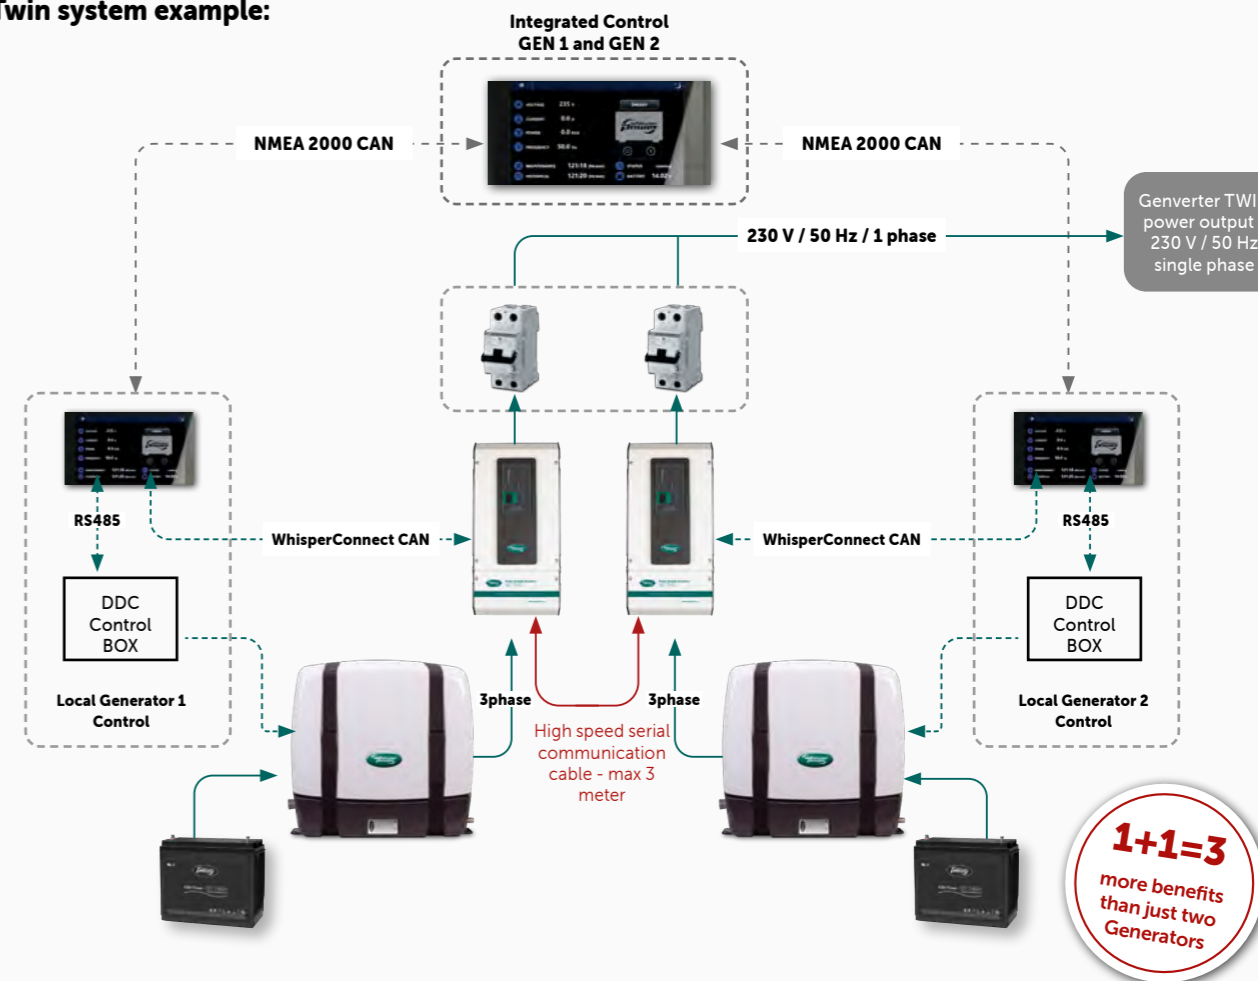

Elite Twin configuration

Easy to install & configure

Our Twin-Power® solution allows you to parallel two WhisperPower Genverter generators with a single high speed communication wire. No extra boxes with oversized switch gear are needed, or other costly add-ons. Just install two generators instead of one traditional product and connect the PMG inverters plus the AC outputs to double the AC Power.

Twin system example:

Important system benefits

Traditional fixed speed generators are chosen in general in oversize, based on the peak power requirements. This often means they are oversized for their normal operation running load. With the Twin-Power solution, the AC appliances are powered by one or two engines. As a result of our Genverter variable speed inverter technology, the engines are running in their most fuel efficient operation area which results in the following benefits:

- ① Double the power, if needed, for example day time (high A/C consumption)
- ② Reduce the power during the night, switch back to one running engine
- ③ Optimized voltage & frequency stabilization ensures excellent power quality
- ④ Optimized noise level and vibration level is guaranteed
- ⑤ Engines are running cleaner with less fuel consumption
- ⑥ Compact Genverter technology offering substantial space saving
- ⑦ New emission level Stage V compliant also in higher kVA range (30 kVA/24 kW)
- ⑧ Redundancy, always one power source for spare

Some more about running generators in parallel

As said, paralleling our Genverter generators can be done simply by connecting two Genverters of the same size together to provide two times the nominal power but also two times the peak power. There are several reasons why mobile owners should not "just buy a larger generator." The most common problem of oversized generators is the negative effect on the diesel engine which starts to pollute, smoke, delivers soot and in the end will show glazing effect of the cylinders. Apart from the fact our Genverter generators are more fuel efficient and significantly quieter than a comparable sized 1500/1800 rpm generator, they run at the right RPM at any time and can operate even in eco mode.

Installation Dimensions

Elite Genverter® DC generators 24 | 48 VDC

ADJUSTABLE
SPEED
DC
OUTPUT

For cases when a constant high power consumption isn't required, installing a Genverter® system with the DC PowerCube, combined with an inverter, can prove to be a smart decision. The advantage of this system is that a non-stop AC power supply is always available. This is thanks to the 4, 7 or 14 kVA AC PowerCube inverter which is connected to one or multiple onboard batteries being charged by one or several DC PowerCubes.

Whenever the 24 VDC / 48 VDC batteries need to be recharged, the Genverter® starts up automatically. At the same time, the DC PowerCube is connected to the shore power - during shore power connection, the various onboard batteries are charged with a maximum of 120 A (3.5 kW). Using the remote control panel, supplied as standard, the shore power can be set to the required ampere value (4,6,8,10,16 A). The DC PowerCube also features a charging socket for 24 VDC batteries (or 48 VDC).

- Simple installation, no transfer switch required
- Continuous, uninterrupted clean power on board in your vehicle
- Genverter® speed adjustable and extremely quiet
- Fast charge with correct and constant engine load
- Low fuel consumption, minimal engine maintenance
- Plug-in worldwide

Installation Dimensions

Diesel generators | 1500/1800 rpm Classic series

Over the past 20 years, WhisperPower generators have established a strong reputation as reliable workhorses. They are regarded to be durable and reliable power solutions, meeting the challenges of commercial and high-end recreational Mobile applications. While the high rpm 3000/3600 generators have been replaced by the quiet and compact Genverter series, our 1500/1800 fixed rpm range has undergone a major upgrade.

The WhisperPower SQ Pro range is the solution for applications where a constant level of high quality, non-stop electrical power is required. Available from 10 kVA to 50 kVA, for single and three-phase output, complete with or without sound guard, inclusive advanced control panels and all necessary installation parts to ensure a durable installation.

General description

- 1500 rpm, 1 or 3 phase, 50 Hz
- 1800 rpm, 1 or 3 phase, 60 Hz
- Robust AVR voltage regulation
- Electronic governor for best power quality (optional)
- Aircooled, industrial back-end
- Liquid cooled diesel engine
- Compact and silent

Features

- Water cooling by radiator
- DDC controls as standard *)
- All connections pre-mounted
- Plug-and-play installation
- Industrial power quality
- Parallel connection optional
- Ungrounded version optional

Benefits

- Highest quality standards
- Home design
- Manufactured in Holland
- Various options - flexibility
- World wide distribution and support
- One-stop-shop
- All installations parts from one address.

Some key features and benefits of the new control & power management panels:

- Remote communications (RS232, RS485 x2, Ethernet)
- Genset parallel functionality included (ask for more detail)
- Provides secure and simple off site monitoring
- Front panel mounting
- Enables fault conditions to be resolved quickly and provides instant system information to aid preventative maintenance
- Graphical displays showing, charts, meters, power display, graphs and engine status information
- Information is displayed clearly and in a universal format for all users
- Language by choice.

DDC Remote

DDC Remote panel as used in the past for our standard versions, still standard supply of our non-Pro and Pro versions

- One touch start button
- V/A/Hz read-out
- Various user menus
- Automatic start/stop.

From DDC to Deep Sea Controls

Important feature of our new SQ Pro range is the new 7 inch full colour Touch Screen Control which is easy to link to existing analogue or digital networks. Our traditional DDC controls are still used for the non-Pro versions.

WhisperCare (optional)

Cloud-based monitoring and control, with all essential start/stop/ control functions for operators and end users.

Top Cool

See page 34/35 to learn more about our various radiator cooling systems.

Perfect sinewave

Industrial power quality for a disturbance free power provision for standard and sensitive consumers.

Service side

One-sided service, perfect access to all maintenance related components.

Optimal Sound Reduction

Professional, high class, effective sound shield with easy access to all sides of the generator. All models of the SQ range come standard with a robust sound guard with corrosion proof metal plating and heavy insulation material for optimal sound reduction.

Units can also be delivered without a sound cover. Ask for our OPEN FRAME UNITS without sound shield.

Parallel operation optional

We can prepare our SQ Pro generators – both for mobile/ land applications - for parallel operation. In many situations large generators operate half load or less during extended periods which causes malfunction of the generator. WhisperPower's parallel solution is a smart choice, reducing maintenance and fuel costs considerable.

Installation Dimensions

Super Quiet Pro | Fixed speed, 50 dBA W-SQ Pro 40 CR

Every W-SQ (Super Quiet) Pro 40 WhisperPower diesel generator is designed for non-stop, 1500 rpm operation under harsh circumstances. They are robust, silent, compact and extremely reliable. All W-SQ Pro 40 generators are made in the Netherlands and severely tested in one of the most advanced generator production facilities in the world, before distributed on a world-wide base by dedicated, service orientated, distribution partners.

Regulations regarding diesel generators for mobile use are becoming more stringent. Not only the emission standard (Stage V is a must) but also the noise level is an important theme. For the German market, WhisperPower developed a super-quiet 40 kVA mobile generator that had to meet a noise standard of 50 dBA. That has worked brilliantly. By using lightweight aluminium elements for the composition of the sound box, the total weight has remained under 875 kg. This includes the exhaust After Treatment system containing a Diesel Oxidation Catalyst (DOC) and a DPF (Diesel Particle Filter). Minimal restrictions in the public space one of the many applications of the new W-SQ Pro 40 Stage V generators is the film television.

Kubota V3800-CR-TE5BG 2 certificates

- Regulation (EU) 2016/1628
- Implementing Regulation (EU) 2018/988
- Delegated Regulations (EU) 2018/987 and (EU) 2018/989

Engine Features

- Diesel fueled
- Four cylinder
- Four stroke
- Stage V
- Closed cooling system
- Double Top Cool cooling system
- Electric fuel lift pump
- Forklift insertion sleeves
- Emergency stop
- External emergency stop (optional)
- Noise level dBA
1m (7m) 68 (53)
- Low oil pressure shutdown
- High engine temperature shutdown
- Low vibration shock mounts
- Disposable oil filter
- Oil drain pump (optional)
- Disposable water/ fuel filter

MAIN SPECIFICATIONS	
Intermittent Power kW at 25°C (77°F)	40 kW
Continuous power kVA at 25°C (77°F)	40 kVA
Continuous power kW at 25°C (77°F)	35 kW
Noise level	58dB
Rpm range	1500 rpm
Cooling	External radiator cooling
Alternator Voltage Regulation	AVR, forced ventilation
Nominal voltage / frequency	230 VAC / 50 Hz - 3x 400 VAC
Peak power 2 s	300 %
Harmonic distortion	< 3 %
Frequency tolerance	± 5 %
DIESEL ENGINE SPECIFICATIONS	
Engine	Perkins-Sabre 4.4 GM - 4 cylinder
Cylinder volume	4400 cc
Bore & stroke	105 x 127 mm
Air consumption	3.6 m ³ /min
Cooling system	Indirect
Fuel consumption (no load - full load)	1-10 l/hr
Starter battery charge current	12 V / 60 A
DIMENSIONS & WEIGHT	
Length x width x height (cabinet)	1658 x 837 x 986 mm
Dry weight	1.000 kg
Dry exhaust / wet exhaust	Ø 2 inch BSP / Ø 76 mm
Oil dipstick	Top & side
Max. operating angle	25° in all directions
CONTROL PANEL	
Standard	Deep Sea Controller
Optional	Keel cooling Crankcase heating 60 Hz

INCLUDED

- #### Deep Sea Control
- Full engine control
 - Robust digital sensor readout
 - Full analogue sensor readout
 - Full monitoring of conventional generators
 - Easy to integrate in PLC with Modbus, CAN or Ethernet
 - Possibility for load sharing and synchronization
 - Optional auto start and switch over on mains failure
 - Remote communications (RS232, RS485 x2, Ethernet)
 - Provides secure and simple off site monitoring
 - Graphical displays showing, charts, meters, power display, graphs and engine status information
 - Information is displayed clearly and in a universal format for all users
 - Language by choice. German, English, French, Italian, Dutch and Spanish.

- #### Top Cool roof cooling system (optional)
- Dimensions: W 1418 x L 584 x D 255 mm
 - Radiators and expansion tank pre-installed. Plug and play, only cooling hoses (4) in/ out and 230 VAC to be connected.

Installation Dimensions

Diesel Generators AtlasGO

ATLASGO are strong, powerful and reliable generator systems that can be picked up and dropped for the next job or installed permanently. Main applications: back-up emergency power for on-grid situations, prime power for off-grid situations, auxiliary power for Lithium based zero-emission power systems with large inverters and so on. Application fields are enormous: telecom, road, railroad, contractor industry, fire departments, etc. The AtlasGO sets are not built to be compact and lightweight, but to have necessary parts integrated in one enclosure.

Ready-to-use Mobile/ Land Generator - AtlasGO

LARGER FUEL TANK Art. Nr. 41400010

When the standard autonomy of the generator is not sufficient, WhisperPower offers the possibility to install a larger fuel tank. This means that you can work for a longer period of time without refueling. This solution can be applied on all AtlasGO generators!

DEEP SEA ELECTRONICS Art. Nr. 41400020 / 41400020

With a Deep Sea Electronics control module, WhisperPower offers the possibility to remotely control and manage a generator.

System explained

What a complete generator system looks like

This page provides an overview of all the essential installation equipment for a generator system. We recommend only using original WhisperPower parts. We provide installation kits for all of our generator models to facilitate installation. All products are high quality and specifically designed for the intended function.

Mobile installation example

Photographs: Courtesy of Prokasro, Karlsruhe

Service, consulting and system development

Supplier of single components

We supply generators, charging technology, inverters and battery systems. Generator systems for 12 VDC / 24 VDC / 48 VDC / 230 VAC / 400 VAC output.

Individual customer solutions

Together with our customers, WhisperPower carries out a system design, exactly matched to the needs and requirements.

System design

As a supplier of complete energy

systems, WhisperPower offers a complete system from one source! This includes generators, charging technology, inverters and battery systems perfectly matched to each other.

Service & Development

Customization of individual components possible

Circuit diagrams

We optionally offer the complete development of circuit diagrams of the energy system.

Commissioning

Depending on the customer's system, WhisperPower can perform commissioning and thus ensure safe operation.

Training

WhisperPower offers several training workshops per year at the headquarter in Drachten/ Netherlands. Furthermore, if required, we also carry out training courses directly on site at our customers. As a tool we also use our demo vehicle with different generators and products.

Radiator Cooling kits

All WhisperPower Classic Generators and Genverters® are liquid cooled in order to cool the engine and electrical alternator. Similar to cars, radiators are needed to cool the liquid to achieve this result. WhisperPower supplies a couple of cooling systems which are shown below.

Our latest Genverter® and SQ Pro generator systems only require ONE RADIATOR. When it comes to ROOF cooling, we offer a TOP COOL system and we supply various radiators for vehicle under floor or side cooling. For cases where high operating temperatures apply we recommend to install a two-radiator per cooling circuit.

WHISPERPOWER TOP-COOL COOLING FOR ROOF INSTALLATION WITH 2 RADIATORS

ARTICLE NUMBER	DEFINITION
40230631	Top-Cool Radiator for the W-SQ Pro 15 and W-SQ Pro 18
40230632	Top-Cool Radiator for the W-SQ Pro 20, 22.5, 25, 27 and W-SQ 32

WHISPERPOWER TOP-COOL COOLING FOR ROOF INSTALLATION (SINGLE RADIATOR)

40201877	Radiator C	Radiator kit cooling engine - Wall installation SQ Pro 15 / 18
40201897	Radiator D	Radiator kit cooling engine - Wall installation SQ 25 / 1-phase
40201898	Radiator D	Radiator kit cooling engine - 3-phase 400 VAC
40201872	Radiator E	Radiator kit cooling engine - Wall installation Elite 15
40201318	Radiator F	Radiator kit cooling engine - 12 V Scalino

Example of a radiator cooling kit: each kit consists of a radiator, cooling fan, electrical motor to operate the cooling fan, temperature resistant hoses, clems and an expansion tank which is supplied with hoses as well.

Dimensions radiator cooling systems

Exhaust systems for all Genverter and SQ models

To make the WhisperPower system as quiet as possible a well designed and installed exhaust system is required. We offer two different exhaust systems. For optimum noise reduction; two silencers are needed and absorption and resonance muffler. When space is limited; our stainless steel Combi absorption/resonance muffler is, in general, a good solution for all 1 & 2 cylinder based systems.

Art. No. 40201326 Stainless steel Combi style muffler for under-floor mounting.

Art. No. 40201326 Stainless steel Combi style muffler, as shown here, prepared for roof mounting. The whole system, incl. roof bracket, is available from WhisperPower.

DRY EXHAUST KIT	
ARTICLE NUMBER	DEFINITION
40201326	Dry exhaust kit 1" Combi style muffler for Scalino models W-GV 8 / 10
40201325	Dry exhaust kit 1" for W-GV 4 Scalino models W-GV 8 / 10
40201875	Dry exhaust kit 1 1/2" for the W-SQ PRO 15, 18 and the W-GV 12 / 15
40201889	Dry exhaust kit 2" for the W-SQ 20, 25, 27, 32

Exhaust mufflers for Genverter/ Classic SQ multi-cylinder models

Complete exhaust kit with absorption muffler, resonance muffler, isolation blankets, flexible steel connection parts and various metal parts needed to create one system. Includes the parts to connect the muffler system to the vehicle.

Original service kits from WhisperPower

The A-kit contains all the spare parts for those items, such as filters and belts, that should be replaced on a regular basis. We advise always ordering an A-kit along with your new WhisperPower generator. The B-kit consists of parts for those items which may need to be replaced after a longer period of time, depending on the number of operating hours. Our B-kits include a larger number of components such as seals and various mechanical parts. For long trips, it is advisable to take a B-kit with you on board of your vehicle.

Hybrid generator system with zero-emission interval operation

The tone has been set already years ago in the automotive sector: Climate-neutral thinking is the credo there. In the maritime sectors, green thinking is still in its infancy. It is high time for technology that contributes to a better ecological footprint in the pleasure craft sector. With the introduction of the new OctoPower systems WhisperPower takes a progressive step towards enhancing comfort, reducing CO₂ emissions and saving operational costs.

Our OctoPower systems provide Super Charger electrical power at locations where electrical power is not available as standard.

Battery Storage & Solar/ Power

The heart of the OctoPower system is a durable power storage, made from Lithium Ion or long life lead-acid battery technology, charged by solar and/or windpower.

Super Inverter

Low voltage battery power is now utilized by the WhisperPower Super Inverters, ranging from 3 kVA to 50 kVA single or three phase electrical power. The Super Inverter now supplies 120 or 230 volts to the power system.

Super Chargers

The WhisperPower Battery Storage is re-charged by one or more WhisperPower Super Fast Chargers. This Super Charger is connected to the main (or shore) power in case this is available.

Solar or WindPower

When main or shore power is not available, we can charge with solar or windpower.

Generator

As a last resort, the ultra silent WhisperPower back up generator, complying with the most stringent emission norms such as Stage V and EPA Tier 4.

Monitoring and Control

WhisperCare monitoring and control safeguards a fully controlled and perfectly managed power system.

Generator replacement system 4 - 14 kVA

- Lithium Power Plus Storage Pack 5.5 – 21 kWh
- Super inverter for silent time, AC PowerCube 4-14 kVA
- Fast chargers, connect to shore power or WhisperPower Genset
- Global input 90-265 VAC, 50-60 Hz
- Compact & super silent generator, 8-50 kVA
- Solar input with MPP trackers
- Connection to other screens, via TOUCH 7 remote panel
- WhisperCare full service remote monitoring
- Pre-fabricated AC and DC distribution

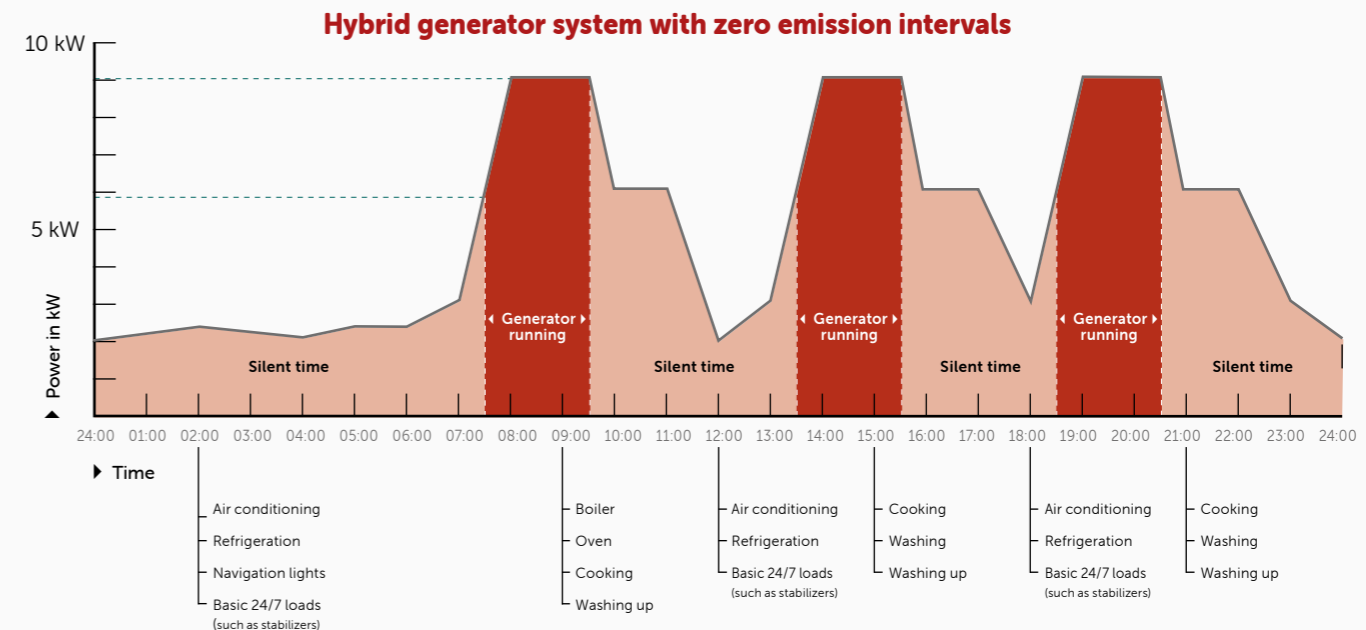

OctoPower systems reduce CO₂ emissions up to 80%

OctoPower helps to stop wasting energy

OctoPower is an effective way for boat owners to save costs

OctoPower stops using diesel generator unnecessarily

The OctoPower Concept

WhisperPower The Company

Established in 2007, with their headquarters in Drachten, the Netherlands, WhisperPower's ongoing mission is to deliver grid independent power systems supporting a cleaner and brighter future.

The company has since built a vast portfolio of associated power products for use in off-grid locations on land and sea. These are assembled in the 5500m² facility and distributed around the World via an ever-growing network of highly-skilled and passionate distributors and dealers. Many of WhisperPower's customers are blue-chip organisations where environmental thinking is now part of their environmental social governance.

Now with a major share of the marine, commercial, recreational and terrestrial mobile markets, WhisperPower continues to expand with the help of its own web-based TV channel, WhisperTV, it's unique Whisper Online Training Programme and an advanced website to assist customers in all fields of WhisperPower technology.

WhisperPower rolled out the first edition of low-emission hybrid diesel generators in 2010, whose quiet-running and fuel efficiency made an immediate impact on marine, mobile and off-grid applications.
